

H.Geometry – Chapter 5– Definition Sheet

Section 5.4

Definition of a Midsegment

-The segment connecting the midpoints
of the two sides of the triangle.

PROVING THE TRIANGLE MIDSEGMENT THM.

- Construct the midpoints of two sides
And connect them
- Measure the length of the midsegment
and compare it to the length of the base

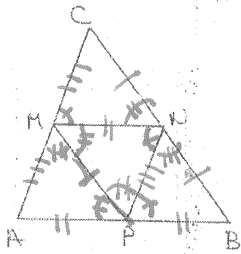

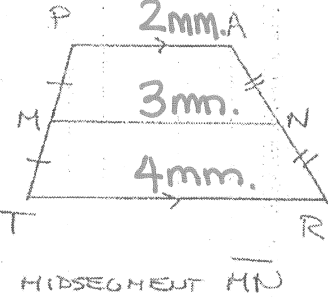

Triangle Midsegment Theorem

The Midsegment of a triangle is:

- A.) parallel to the third side
- B.) 1/2 the length of of the third side

H. Geometry – Chapter 5– Definition Sheet

<p>Three Midsegment Theorem</p>	<p>The three midsegments of a triangle divide the triangle into <u>4 congruent</u> triangles.</p>	
<p>Midsegment of a trapezoid</p>	<p>The segment connecting the midpoints of the two <u>legs</u> of the trapezoid</p>	
<p>Trapezoid Midsegment Theorem</p>	<p>The midsegment of a trapezoid is:</p> <p>A.) <u>parallel</u> to the bases</p> <p>B.) Has length equal to the <u>average</u> of the <u>lengths</u> of the bases.</p>
